

Pareto Distribution of SOEP and the Pretest with fitted regression lines

Source: SOEP 2012 (v33.1) and Pretest 2017.

Note: We display only 1 net wealth variable. For the SOEP we scale down the cross-sectional weights by 1% and added the weights of the Pretest. Threshold at 99% percentile of the Abbrev.: nw =net wealth, $sppt$ =SOEP+Pretest.
